ELASTANE

Sock-fitting system, comfortable and quick, even when taking off.

DRY'N AIR OMNIA

The Dry'n Air anatomical insole is removable and scented, with air circulation. Equipped with a system of channels and holes, it promotes air circulation between the foot and the sole. The result is maximum breathability and dry feet.

UPPER

In water-repellent microfiber, without seams that end up in the sole, water resistant.

SLIMCAP

Thin non-metallic tip: reduced tip thickness of 6.5 mm, 35% less than the market standard. Equipped with a perfectly shaped protective band on the toe to prevent pressure and pain on the toes.

LIFE PLUS

Life Plus is the technology designed by Base Protection to guarantee grip and an anti-wear effect on the soles in work environments characterised by the constant presence of water, effectively lengthening the product's lifecycle.

AIRTECH SINGLE DENSITY

Flexible and light anti-fatigue sole:

- adapts to any type of surface
- high slip resistance

WHICH FOOT ARE YOU? ASK

SCAN&FIT

UNIQUE COMFORT EXPERIENCE.

Scan & Fit is the new Base Protection App that **turns your smartphone into a 3D scanner**, to suggest the footwear and footbed that best suit your feet, your work and your safety needs.

HOW DOES IT WORK?

Download the App or contact your trusted reseller to:

- 

① scan your foot for free
- 

② discover the most suitable Base Protection footwear
- 

③ identify the corresponding size
- 

④ match the ideal footbed to the morphology of your foot

FOR EACH FOOT, ITS OWN COMFORT.

What morphotype are you?

Fabric surface with **X Static®** yarns containing silver fibres, along with **HeiQ Pure SPQR®** antibacterial and anti-odour treatment.

With the **Scan&Fit footbed**, when combined with your **Base Protection footwear**, the certification of your footwear is maintained in compliance with the **EN ISO 20345:2011** and **EU 425:2016** standards. All Scan&Fit insoles are CE certified as a class 1 medical device according to Regulation (EU) 2017/745.

The soles are equipped with technology Dry'n Air®:

A system of channels and holes allows air circulation inside the shoe, keeping the foot cool and dry.

Cushioning area positioned in the heel, which reduces pressure.

Discharge area in the center of the heel to prevent possible inflammation.

Materials that constantly discharge electrostatic charges to the ground, making them compatible with all ESD styles of Base Protection.

NEW FOOTBED DRY'N AIR® OMNIA ZERO

The **Dry'nAir® Omnia Zero** footbed enhances the comfort of footwear by increasing the thermal insulation of the foot through the addition of a thin layer of aluminum, which reduces heat loss through the radiation of foot heat.
